PASTURE SOIL HEALTH WORKSHOP

Join VFGC for this one-day workshop to learn how to improve soil health in your pastures.

Featuring Doug Peterson

Doug is retired from Missouri NRCS where he served as a soil health specialist. He now operates his own 250-cow grazing operation focused on adaptive grazing and improving soil health.

Topics to be covered:

- Implementing soil health principles on pasture
- Biological nutrient cycling
- In-field soil health evaluation
- Increasing diversity in the forage system
- Developing forage-focused herd genetics
